The „Virtual OFF-Line Contest 2024“

In 2022 the AEROCLUB | NRW has introduced a committee for Virtual Airports (AVL). In 2023 we ran our first „Virtual OFF-Line Contest“. We have decided to continue this contest in 2024. Here you'll find all necessary information about our new contest *VOC2024*.

The Tasks

You have two levels to choose from: „Standard“ and „Expert“. Tasks are roughly between 30 and 100 km long with a maximum flying time of round about half an hour.

Our exciting tasks are quite often full of tricks and surprises and will take you above breathtaking landscapes. We publish two tasks at the beginning of each month. At the end of the year you will have 24! tasks to choose from.

Tasks may be repeatedly flown all year round as scoring is only once after the end of the year.

Location of Tasks

All tasks can be found in Condor Club. Just search for „VOC2024“ in *Tasks – Name criteria – Name contains*.

Landscapes

So far we have used only Alpine 2 (Arc Alpin 2) and Slovenia 2. For some tasks this year we may introduce these landscapes: Réunion, Southern Norway 4, West Germany 3 and Big Pyrénées 2. All downloads are for free from Condor Club!

Gliders

The restriction to two gliders has been lifted. We will permit more gliders but may allow one class only. DAeC handicap will always be used for scoring. Water ballast permitted!

Competitors

The *VOC2024* is an international competition. No application needed. Everybody worldwide may take part. Simply download a task and fly it on your own PC. Then upload / publish it: <https://www.condor.club/addtask/5/>. In „Best Performances“ you will instantly find your placement.

Don't forget: You may not alter a task! If you do so, your flighttrack will not be acknowledged!

Software

You need the programm *Condor 2*. The basic pack for €59,99 is quite sufficient. The „Pro Version“ for €299,99 contains more gliders. Both packs are available for download from <https://www.condorsoaring.com/>.

Additional gliders may be bought separately for prices between €10,99 to €19,99.

Hardware

Most PCs are sufficient as the program *Condor 2* may be modified quite easily. A joystick is not necessary but makes flying much easier. We recommend a basic model.

Evaluation

You may fly any task as often as you like. Only your best flight will appear in the according results table.

Only the points of your 6 best flights will be used after the end of the year to find the winners of the year. Therefore it is not necessary to fly all tasks.

There will be two winners for *Standard*- and *Expert*-Level each. Theoretically it is possible to win even both levels.

„Ghosts“

Flying against ghosts is allowed and highly recommended: Download flights of other pilots from results tables and learn from them. Good fun anyway. Also to fly against yourself...

Tasksetter

So far only the AVL-members Ben Fest and Reinhold Röder have created tasks. But you may also propose a task of your own. Just send us your flightplan(s) for evaluation!

Outlook

In spring 2024 we might also run a Virtual ON-Line competition. We will keep you informed on this homepage!

Legal Notice

Any legal recourse is excluded. We reserve the right to exclude pilots in the case of cheating. We may also end the contest prematurely. Only the last version of this information is valid.

We wish everybody good fun and hope for many pilots. It's really so easy: **DOWNLOAD! FLY! PUBLISH!**
